CONSERVE WATER, SAVE ENERGY AND REDUCE YOUR BILLS

IT MAKES SENSE TO SAVE WATER

Using water saving devices
- PROTECTS THE ENVIRONMENT
- MINIMISES WATER CHARGE BILLS
- SAVES ENERGY

WATER SAVING DEVICES

TOILET SYSTEMS

RETROFIT OPTIONS

Water displacement

9 LITRE CISTERN + 3 LITRE WATER SAVER = 6 LITRE CISTERN (NOM)

CAUTION: Take care that the flush volume is never less than 6 litres

UP TO 9% less water consumption

TIP: Use water bottles as a cheap option

NEW SYSTEMS

Dual flush

6 LITRE FLUSH 3 LITRE FLUSH

UP TO 16% less water consumption

CAUTION: Reducing flush volumes in existing toilets could result in unsatisfactory performance. Replacement with a dual flush toilet might be more efficient and sustainable.

NOTE: All toilet systems are compared to a standard 9L flush system

LOW FLOW SHOWER HEADS

You should have an automatic compensating type shower valve to balance changes in incoming pressure or temperature. Seek the advice of a professional plumber.

UP TO 12% less water consumption

TIP: Save even more by cutting your shower time

OTHER DOMESTIC DEVICES

AERATORS

Are low cost devices which produce a large, soft, non-splashing stream.

UP TO 4% less total water consumption

UP TO 10% less total water consumption

EFFICIENT APPLIANCES

WATER EFFICIENT WASHING MACHINES

3% LESS WATER USAGE

FULL LOAD
• ECO SETTING
• NO PRE-RINSE
SAVES WATER OVER HAND WASHING

WATER EFFICIENT DISHWASHERS

SAVINGS SUMMARY

AS MUCH AS 40% WATER SAVING IS POSSIBLE

SAVING WATER SAVES MONEY

SAVE UP TO €220 IN ANNUAL ENERGY COSTS

* Potential maximum saving of €220 or €70 for a 3 person household with an immersion heater or a gas boiler, respectively
