

CONTENTS

Summary	X	Population	14	Climate Change Research	39
		Households	16	Conclusions	41
SECTION I		Public Perceptions and the Environment	17	References	41
INTRODUCTION		The Economy	17		
Chapter 1		Agriculture, Forestry, Fishing	18	Chapter 4	
Introduction	3	Industry	18	Ambient Air Quality and Transboundary Emissions	43
Authors: Jacinta Ponzi, John Curtis		Energy	20	Authors: Barbara O'Leary, Michael McGettigan	
Introduction	4	Building and Construction	20	Introduction	44
Regulatory and Policy Framework	4	Tourism and Travel	21	The Current Situation	44
Climate Change	5	Infrastructure	22	Air Quality Zones	44
Water Quality	5	Conclusion	23	Monitoring Stations	44
Air Quality and Emissions	6	References	23	Particulate Matter	45
Waste	6			Nitrogen Dioxide and Oxides of Nitrogen	47
Chemicals	6	SECTION II		Ozone	47
Land, Soil and Biodiversity	7	CLIMATE CHANGE AND AIR QUALITY		Sulphur Dioxide	48
Noise	8			Lead	49
Other EU Policy Developments	8	Chapter 3		Benzene	50
EU Environmental Action Programmes	8	Greenhouse Gas Emissions and Climate Change	27	Carbon Monoxide	50
Access to Information on the Environment (AIE)	8	Authors: Ken Macken, Michael McGettigan, Frank McGovern		Emissions of Transboundary Pollutants	51
Strategic Environmental Assessment (SEA)	9	Introduction	28	Progress towards National Emissions Ceilings in Ireland	52
Research	9	Understanding Climate Change	28	Other Substances	54
Conclusion	9	The Kyoto Protocol	29	Our Response	54
References	10	GHG Emission Trends	30	Forthcoming Legislation	55
		Drivers of GHG Emissions	31	Conclusion	55
		Emissions Projections	33	References	55
		Projected GHG Emissions Trends	36		
Chapter 2		Addressing Climate Change	38	SECTION II SUMMARY	
Socioeconomic Developments	13	Emissions Trading	39	Climate Change and Air Quality	56
Authors: John Curtis, Jacinta Ponzi		Carbon Sinks	39	Climate Change	56
The Socioeconomic Context	14	Carbon Capture Storage	39	Air Quality	57
Introduction	14				

Improving Air Quality in Towns	57
Improving Air Quality in Cities	58
Meeting National Emissions Targets	59

SECTION III WATER

Chapter 5

The Water Framework Directive – A New Management Approach	63
--	-----------

Author: Garrett Kilroy

Overview of New Approach	64
New Arrangements for National Implementation	66
The Characterisation of Ireland's River Basins	67
New Monitoring Programmes	69
How Will the Status of Surface Waters be Determined?	69
Ecological Status/Potential	69
Chemical Status	70
Overall Surface-Water Status	70
New Biological Classification Systems and Environmental Quality Standards	70
How Will the Status of Groundwaters be Determined?	71
Role of Research	72
Environmental Data Exchange Network (EDEN) – Reporting on the WFD	72
Public Participation in River Basin Planning	73
Challenges to Meeting the Objectives of the WFD	74
River Basin Planning	74
References	75

Chapter 6

Groundwater	77
--------------------	-----------

Authors: Matthew Craig, Donal Daly

Introduction	78
Groundwater Sources of Drinking Water	79
Groundwater and the WFD	79
WFD Risk Characterisation	80
Groundwater Monitoring	80
Appraisal of Existing Groundwater Data	81
Groundwater Quality	81
Groundwater Levels	86
Groundwater Classification and Measures	87
Future Developments	88
Groundwater Directive	89
Conclusions	89
References	89

Chapter 7

Water Quality of Rivers	91
--------------------------------	-----------

Authors: Martin McGarrigle, Catherine Bradley, Ciarán O'Donnell

Water Quality of Rivers and Streams	92
River Classification	92
River Quality 2004-2006: National Position	93
River Quality 2004-2006: Regional Position	93
Causes of Pollution	94
Slight and Moderate Pollution	94
Serious Pollution	96
Fish Kills	96
Phosphate and Nitrate in Rivers	99
Dangerous Substances Monitoring	102
References	103

Chapter 8

Water Quality of Lakes	105
-------------------------------	------------

Author: Deirdre Tierney

Introduction	106
Assessment of Eutrophication and Lake Classification	106
Recent Assessment of Lake Water Quality	107
Current Trophic Status	107
Lake Assessment by RBD	109
Long-Term Trends in Lakes' Water Quality	109
Acid Sensitive Waters	109
References	111

Chapter 9

Estuarine and Coastal Waters	113
-------------------------------------	------------

Authors: Shane O'Boyle, Georgina McDermott, Robert Wilkes

Introduction	114
Nutrients and Eutrophication in the Marine Environment	115
Quality of the Marine Environment	115
Trophic Status of Irish Estuaries and Nearshore Coastal Waters	115
General Water Quality	116
Winter Nutrients in the Irish and Celtic Seas	117
Radioactivity in Irish Marine Waters	117
Metals and Chlorinated Compounds in Fish, Shellfish and Cetaceans	118
Dioxins, Polychlorinated Biphenyls and Brominated Flame-Retardants in Fish	118
Quality of Shellfish and Shellfish Waters	118
Shellfish Biotoxins	119
Irish Shellfish and Public Health	120

Oil Pollution Incidents	121
Bathing Water Quality	121
Pressures on the Marine Environment	123
Marine Litter	123
Coastal Zone Development	124
Marine Aggregate Extraction	124
Offshore Oil and Gas Exploration	125
Dredging of Harbours and Marinas	125
Pressures from Fisheries and Aquaculture	126
Impacts of Fishing on Fish Stocks and the Environment	126
Shellfish	128
Deepwater Species	128
Impacts of Aquaculture	129
Climate Change and the Marine Environment	131
Marine Research and Development	132
Conclusions	132
References	134

SECTION III SUMMARY

Protecting our Water Resources	136
Key Issues Facing Our Water Resources	136
Responding To The Challenges Facing Our Water Resources	137
References	138

SECTION IV WASTE & RESOURCE USE

Chapter 10

Sustainable Resource Use, Consumption and Waste	143
Author: Gerry Byrne	
Introduction	144

Causes of Increasing Waste Generation	144
The Current Situation	145
Construction and Industrial Waste	145
Municipal Waste	146
Hazardous Waste	147
Export of Recyclable Waste	148
Waste Management Infrastructure	148
Response to Date and Future Needs	148
EU and National Policy	148
Waste Management Planning	149
Industrial Waste	149
Producer Responsibility Initiatives	149
Challenges	151
Summary	152
References	152

SECTION V TERRESTRIAL ENVIRONMENT AND BIODIVERSITY

Chapter 11

Land Use	157
Authors: George McHugh, Tadhg O'Mahony	
Introduction	158
Land Use and Land Cover	158
Occurrence of Land Cover/Land Use Classes	159
Urban Settlements	159
Rural Settlements	160
Agriculture	162
Rural Environment Protection Scheme (REPS)	163
Biofuel Crops	163
Wind Energy	164
Forestry	164
Coastal Zone	165

Key Issues	166
Strategic Environmental Assessment	166
Urban Settlements	167
Rural Settlements	167
Agriculture	168
Forestry	169
Coastal Zone	170
References	170

Chapter 12

Soil	173
Author: Jane Brogan	
Introduction	174
The Current Situation: Our State of Knowledge of Soil and Soil Quality	174
Soil Quality	174
Sources of Information on Soil	174
The General Soil Map of Ireland	175
National Soil Database	176
Pressures Leading to Deterioration or Loss of Soil Functions	177
Decline in Soil Organic Matter	177
Soil Erosion by Wind and Water	178
Surface Sealing	179
Compaction	179
Loss of Soil Biodiversity	179
Soil Contamination	179
Landslides	181
Our Response	182
Conclusion	183
References	183

Chapter 13

Biodiversity	187
Author: Conor Clenaghan	
Introduction	188
Habitats and Species in Ireland	188

Legislative and Policy Framework	189
International and European Frameworks and Conventions	189
National Legislative and Policy Framework	192
Biodiversity in the Wider Countryside and the Impact of Selected Sectors	197
Agriculture	198
Forestry	199
Fisheries, Aquaculture and Marine Biodiversity	200
Peatland Utilisation	201
Invasive Alien Species and Alien Genotypes	201
Climate Change and Biodiversity	203
Public Education, Awareness and Participation	204
Our Response	204
References	207

SECTION V SUMMARY

Terrestrial Environment and Biodiversity	210
Integration at a Policy Level	210
Integration at a Strategic Level	210
Data Required for Better Decision-making	210

SECTION VI PROTECTING AND MANAGING THE ENVIRONMENT

Chapter 14

Chemicals and Other Environmental Issues	215
Authors: Conor Clenaghan, Colman Concannon, Patrick Kenny, Kirsty Nolan	
Introduction	216
Chemicals in the Environment	216
Persistent Organic Pollutants	216
PCBs	216

Heavy Metals	217
Pesticides	217
REACH	219
Classification, Packaging and Labelling of Chemicals	220
Endocrine-Disrupting Chemicals	220
Pharmaceutical and Personal Care Products	221
Nanoparticles	221
Dioxins	222
Dioxin Monitoring in the Environment	222
Genetically Modified Organisms	223
Radioactivity	223
Naturally Occurring Sources of Radioactivity	224
Radon	224
Thoron	224
Cosmic Radiation	225
External Gamma Radiation	225
Internal	225
Occupational	225
Man-made Sources of Radioactivity	225
Medical	225
Artificial Radioactivity	225
Radioactivity Monitoring of the Irish Environment	225
Environmental Noise	226
Infrastructural Noise	226
Conclusions	226
References	228

Chapter 15

Sectoral Analysis and Future Outlook	233
Author: John Curtis	
Introduction	234
Baseline Scenario – ‘Business as Usual’	234
Waste Generation and Management	235

Waste – Sector Analysis	236
Air Emissions	239
Air Emissions – Sector Analysis	240
Scenarios	240
Biodegradable Municipal Waste (BMW)	240
Summary	243
References	244

Chapter 16

Main Environmental Challenges	247
Authors: Mícheál Lehane, Lisa Sheils	
Introduction	248
Limiting and Adapting to Climate Change	249
Air Quality and Emissions to Air	250
Protected Water Resources	251
Waste and Resource Use	252
Biodiversity and Soil	253
Integration and Enforcement	255
Emerging Issues	256
Role of Research and Environmental Technologies	257
Conclusions	258
References	261

Acronyms/Abbreviations 262

Glossary 266
