

Ireland's Greenhouse Gas Projections With Additional Measures (WAM) 2023-2050

Projected total greenhouse gas emissions (including LULUCF)

Ireland's projected emissions profile With Additional Measures

29% Reduction in greenhouse gas emissions by 2030 compared to the 2018 level

↓62%
Energy Industries (2022-2030)

↓18%
Agriculture (2022-2030)

↓27%
Residential (2022-2030)

↓57%
Commercial & Public Services (2022-2030)

↓26%
Transport (2022-2030)

Early implementation of climate and environmental actions needed for long term improvement.

What can you do?

Your means of transport

Reduce your transport carbon footprint by making use of alternatives to the private car such as:

Your home

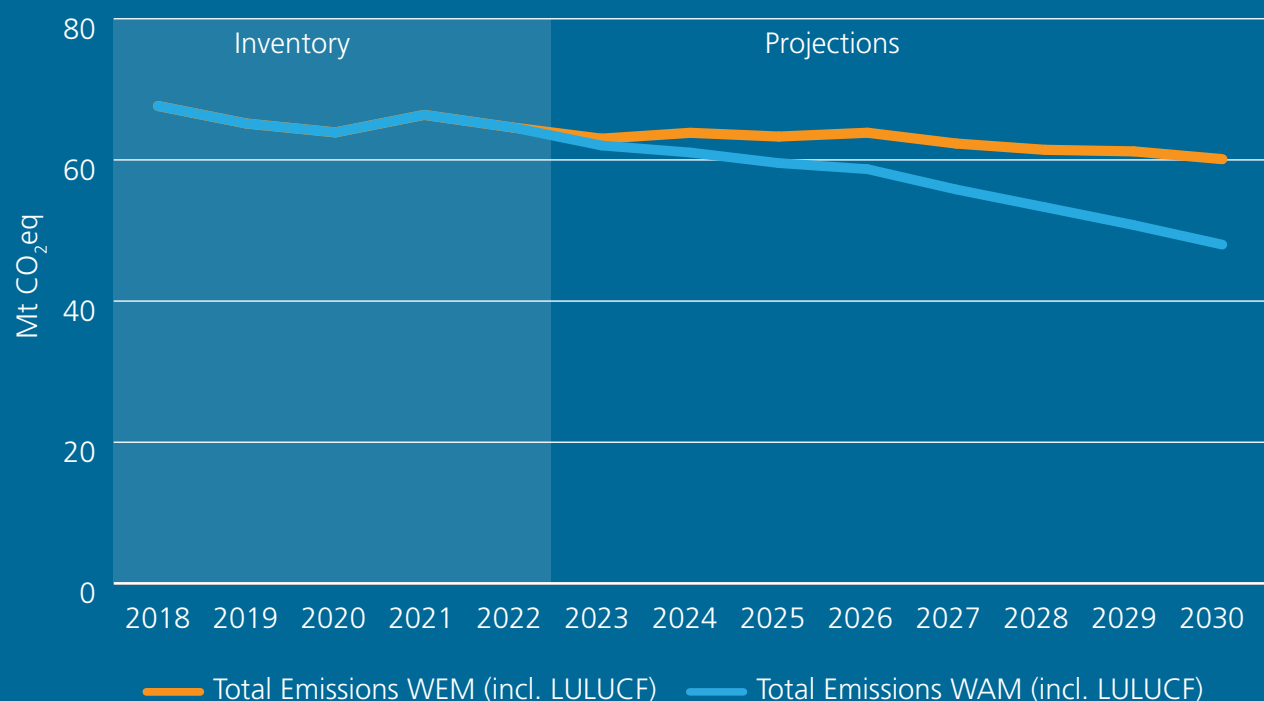

Avoiding food waste is a climate action you can do every day. Check out www.stopfoodwaste.ie

Improve the energy efficiency of your dwelling by taking up SEAI grants and enjoy a more comfortable home with a smaller carbon footprint.

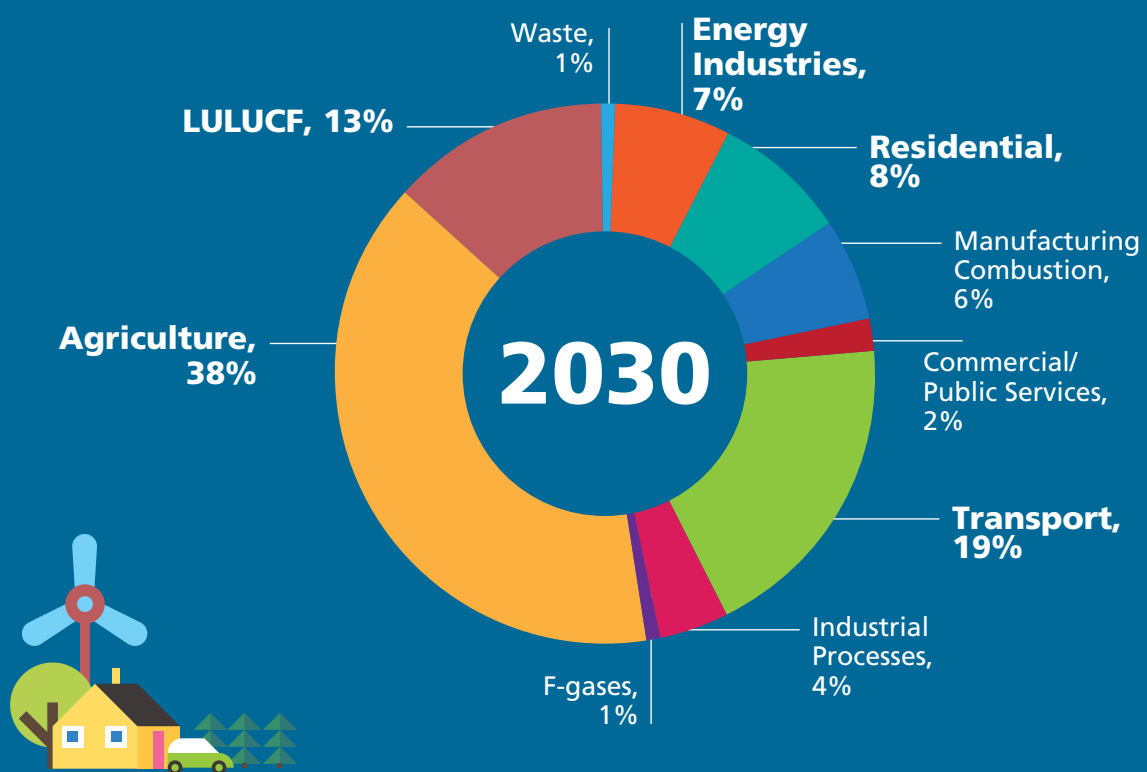

Ireland's Greenhouse Gas Projections With Existing Measures (WEM) 2023-2050

Projected total greenhouse gas emissions (including LULUCF)

Ireland's projected emissions profile With Existing Measures

11% Reduction in greenhouse gas emissions by 2030 compared to the 2018 level

↓57%

Energy Industries (2022-2030)

69% Energy from Wind and Solar by 2030

↓1%

Agriculture (2022-2030)

Use of low emission slurry spreading for pigs has been implemented

↓15%

Residential (2022-2030)

Heat Pump grants, effective ban on oil (from 2022) and gas (2025) boilers

↓19%

Commercial & Public Services (2022-2030)

Energy efficiency programmes including retrofits

↓5%

Transport (2022-2030)

Over 0.7 million electric vehicles by 2030 and increased use of biofuel

Early implementation of climate and environmental actions needed for long term improvement.
